Community Health Status Indicators
CHSI 2009

Our Mission: Provide Information for Improving Community Health

Relative Health Importance: San Benito County, CA

🍎 *Indicates a status favorable to peer county median value*

🔍 *Indicates that a closer look and perhaps reduction to the percent or rate may be needed. Blank indicates no comparison.*

Your Health Status Compared to Peers

	UNFAVORABLE	FAVORABLE
UNFAVORABLE	🔍 • Births to Women age 40-54 • No Care in First Trimester • Motor Vehicle Injuries • Stroke	
FAVORABLE		🍎 • Low Birth Wt. (<2500 g) • Very Low Birth Wt. (<1500 g) • Premature Births (<37 weeks) • Births to Women under 18

Your County's Health Compared to US Rates

- Births to Unmarried Women
- Infant Mortality
- White non Hispanic Infant Mortality
- Hispanic Infant Mortality
- Neonatal Infant Mortality
- Post-neonatal Infant Mortality
- Breast Cancer (Female)
- Colon Cancer
- Coronary Heart Disease
- Lung Cancer
- Suicide
- Unintentional Injury

The Relative Health Importance table creates four categories of relative concern by simply comparing a county to its peers and to the U.S.

A county's indicators in the Unfavorable/Unfavorable Quadrant (🔍) are higher than the U.S. and its peers and may warrant more attention. Conversely, indicators in the Favorable/Favorable Quadrant (🍎) of the table compare favorably to both peers and the U.S. The other boxes represent intermediate levels of health where a county's rate is higher than either its peers or the U.S., but not both.
